INTERNSHIPS

Web Scraping , RISE GLOBAL EDUCATION **May 2025 - Jul 2025**

- Built a Python AI blog-generation CLI using **Ollama local LLMs , Typer, Rich , prompt templates , retries , JSON validation , and Markdown export** to automate structured SEO-style content creation from user-provided topics .
- Developed a web scraping automation pipeline with **Requests , BeautifulSoup , regex , sessions , tqdm , logging , and CSV export** to extract profile links , parse names , validate emails , remove duplicates , and reduce manual research effort .

FULL STACK WEB DEVELOPER , Sitaram Seva Sansthan **Aug 2023 - Jul 2026**

- Built and deployed a full-stack NGO platform across **2 linked Next .js apps** : a public website and secured CMS dashboard using **Next .js, React , TypeScript , Turso, Drizzle , Clerk , ImageKit , Tailwind CSS , shadcn / Radix UI** , powering posts , events , media uploads , latest program flyers , and public content APIs .
- Implemented donation and AI workflows that helped generate **INR 65,000 + in donations** , integrating **Razorpay payment verification** , QR/bank transfer options , Hindi translation , and **Sarthi** , a CMS-backed RAG assistant using **Vercel AI SDK , AI Gateway , and vector embeddings .**

PROJECTS

CabLite - Campus Carpooling & Rental-Sharing Platform - Web Development **Mar 2026 - May 2026**

Live: cablite .xyz | **GitHub :** rawatpriyansh17 /cablite -app

- Built and launched a campus-first carpooling and rental-sharing platform for BITS Goa , crossing **800 + users** with real student workflows for rides , rentals , requests , approvals , and coordination .
- Engineered a real-time backend with **Convex + Clerk** , modeling rides , rental shares , passengers , requests , notifications , group chats , phonebook contacts , and mutation rate limits .
- Integrated **MapLibre + OSRM routing** with a curated Goa location system for route distance , travel duration , category-aware search , map markers , and route previews .
- Designed and shipped the full product solo using **Next .js 16 , React 19, TypeScript , Tailwind CSS 4, Motion , Vercel Analytics** , and responsive mobile-first UI from Figma to production .

Sitaram Seva Sansthan - NGO Website , Donations & AI Assistant - Web Development **Aug 2023 - Present**

Live: sitaramsevasansthan .org | **GitHub :** rawatpriyansh17 /SITARAMSEVASANSTHAN

- Built a production NGO website that has helped generate **INR 65,000 + in donations** , combining Razorpay checkout , QR donations , bank transfer details , anonymous donations , and verified payment storage .
- Developed a CMS-driven public site with **Next .js 16 , React 19, TypeScript , Tailwind CSS 4, ImageKit , Turso, Drizzle ORM** , and optimized event/post rendering with 60-second CMS revalidation .
- Implemented multilingual support with **General Translation** , keeping English as the CMS source of truth while supporting Hindi UI/content translation with safe fallbacks .
- Built **Sarthi** , a floating AI assistant using **Vercel AI SDK , AI Gateway , Streamdown , shadcn chat UI , and CMS-backed RAG search** to answer donation , program , contact , and event queries .

Content Management System - Web Development **Jun 2024 - Present**

Live: dashboard .sitaramsevasansthan .org | **GitHub :** rawatpriyansh17 /ngocms

- Built a secure CMS dashboard for Sitaram Seva Sansthan with **Clerk authentication** , managing posts , event pages , event media , latest program flyers , ImageKit uploads , and public API delivery .
- Designed a normalized CMS database with **5 core content models** : posts , events , media , latest event , and AI embeddings using **Turso/ libSQL + Drizzle ORM** .
- Implemented a CMS-owned RAG pipeline with **1536-dimensional vector embeddings** , protected AI search APIs , hash-based embedding refresh , and dashboard-level AI sync status / retry UX .
